

Evaluation of the entrance test

Haas, Felix , 996381

Total points: 27 out of 41.

That wasn't bad at all, but with some repetition and consolidation of the school material, you would gain confidence.

Detailed evaluation:

Fractions (2 out of 4 points): You still have a few deficits in fractions. A little practice won't hurt.

Percentage calculation and proportionality (3 out of 5 points): You are still unsure about percentages and proportionality. Repeat the basics!

Power laws and roots (8 out of 12 points): Please repeat the power laws and calculating with roots, as you are still unsure.

Equations (4 out of 6 points): You still have uncertainties in solving equations and should repeat this.

Inequality (0 out of 2 points): You still need practice in dealing with inequalities.

Coordinate system (4 out of 4 points): You are certain with the subject of the coordinate system.

Elementary functions (6 out of 6 points): You have a good foundation in elementary functions.

Tangent line (0 out of 2 points): You should repeat what a tangent line is and how to calculate it.
